

Long Island Based Healthcare Company Donates To Nassau County Sandy Relief

Hauppauge, New York – December, 2012

In the wake of super storm Sandy, Crosstex International, a leading manufacturer of single-use infection prevention and control products, recently donated much needed supplies to the Sandy relief effort. Crosstex donated several pallets of face masks, gloves, hand sanitizer and surgical sponges to the Nassau County Office of Emergency Management to aid residents affected by the storm.

Being a Long Island based company, Crosstex was able to quickly respond. In particular, the face masks, gloves and hand sanitizer all helped to protect both the victims and the volunteers through the recovery process in the aftermath of the storm.

“We know the effects of this storm have been devastating, especially here on Long Island,” said Pamela Runge, Crosstex’s Vice President of Marketing. Runge went on to say “While the company is a recognized global leader of infection prevention and control products for the healthcare industry, our roots are right here on Long Island, where we employ nearly 100 people. Our products are manufactured to protect people and we are thankful to be able to give back to the local community in this time of need.”

About Crosstex International, Inc.
